

Classification of ACS patients is based on the electrocardiogram (ECG).

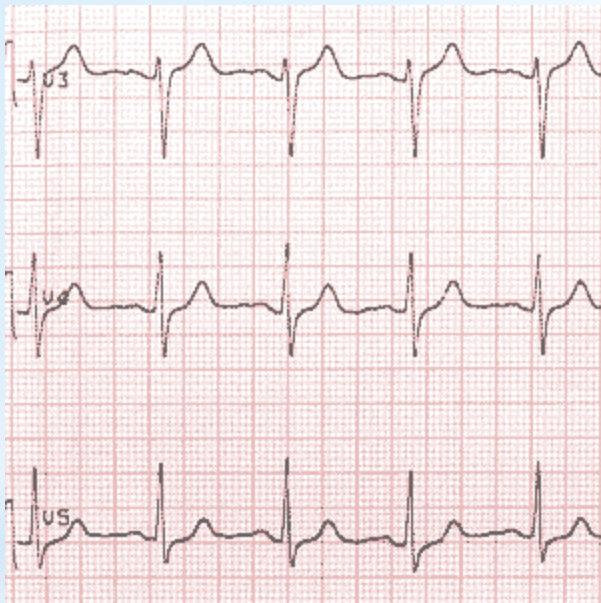

ST-elevation

non-ST-elevation

Test and Diagnosis

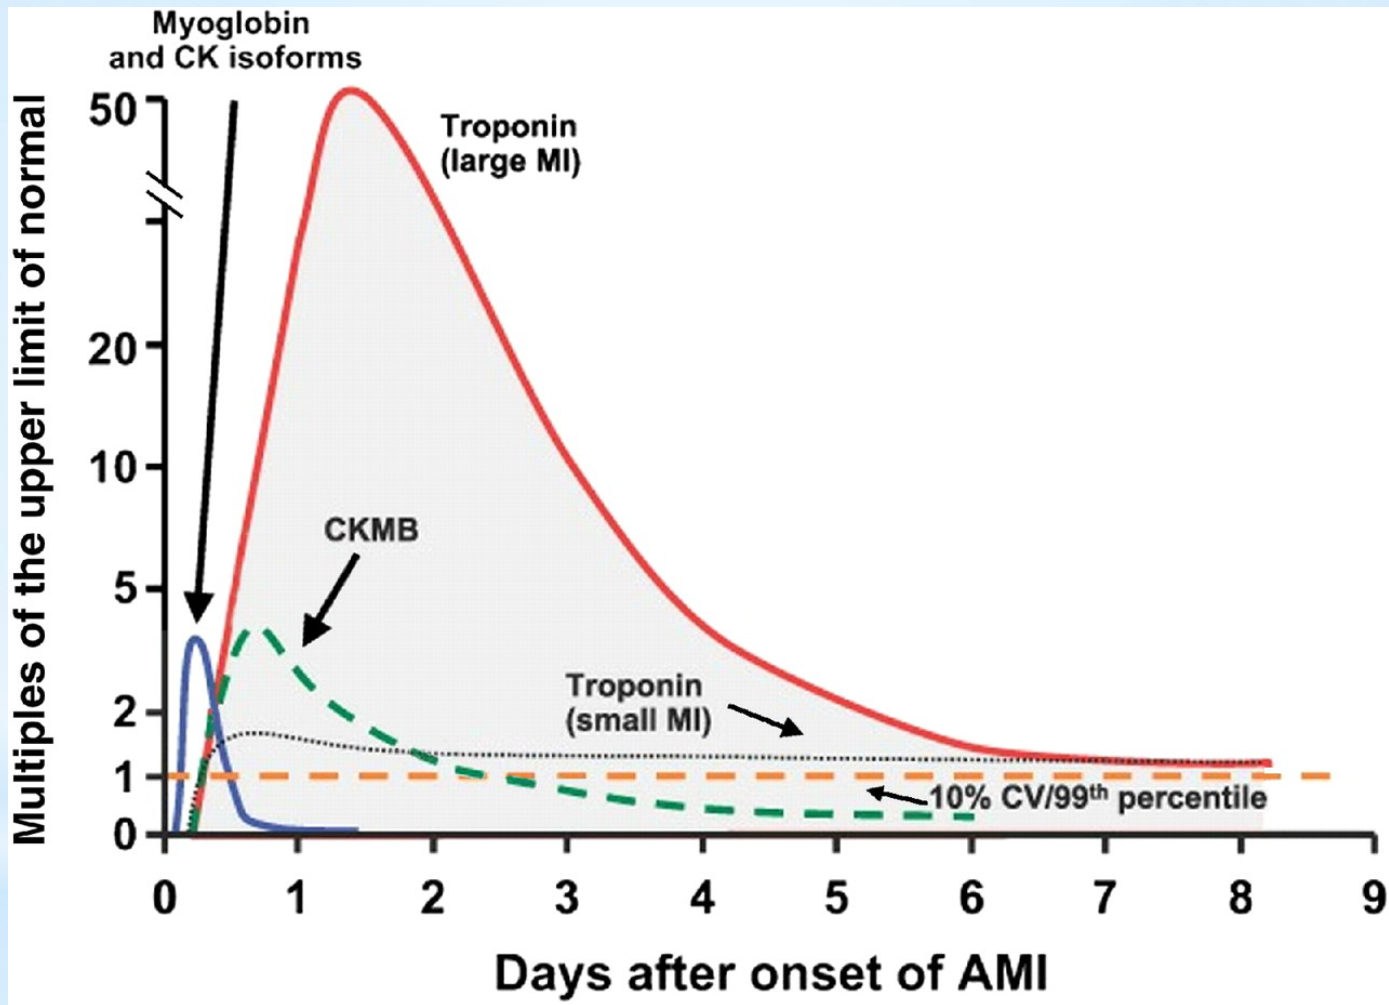

Electrocardiogram (ECG)

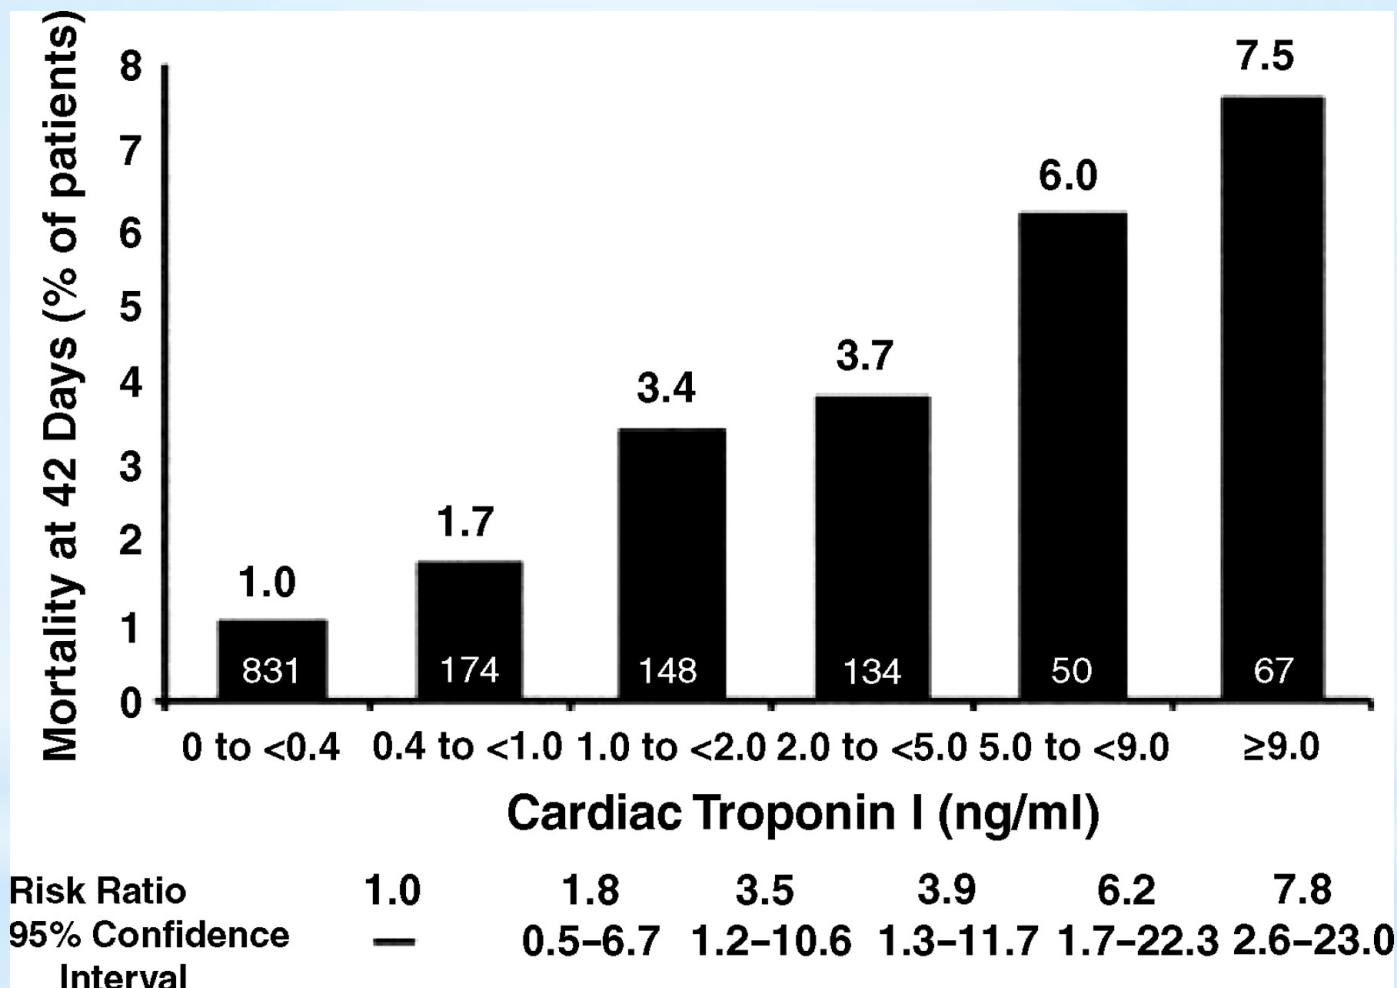

Blood tests

Timing of Release of Various Biomarkers After Acute Myocardial Infarction

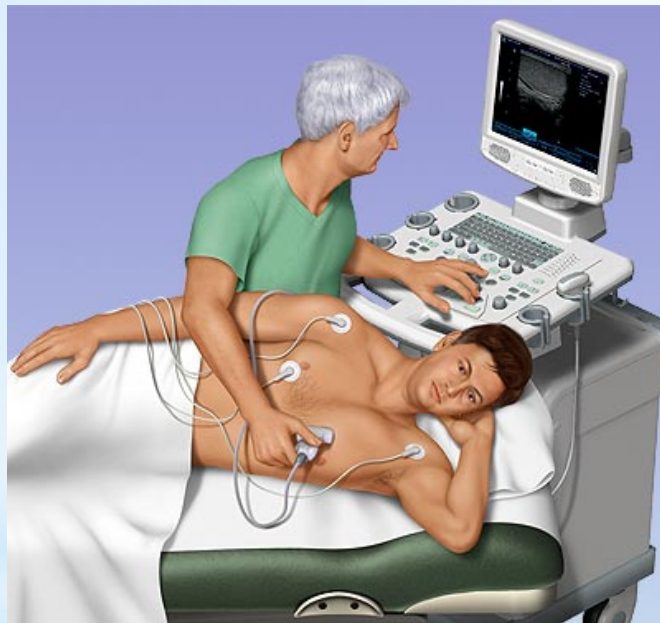

Anderson, J. L. et al. J Am Coll Cardiol 2007;50:e1-e157

Troponin I Levels to Predict the Risk of Mortality in Acute Coronary Syndromes

Anderson, J. L. et al. J Am Coll Cardiol 2007;50:e1-e157

Other additional tests

Echocardiogram

Chest X-ray

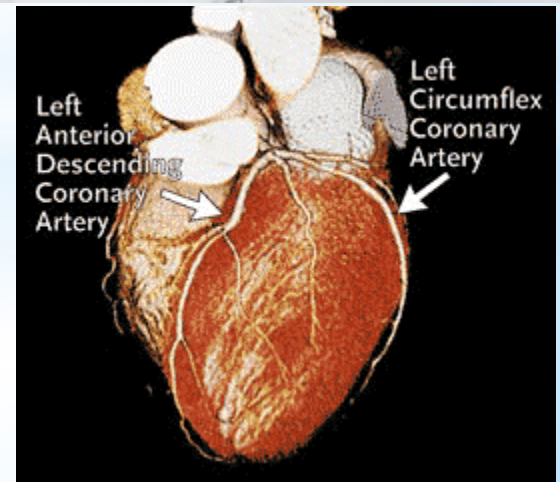

Other additional tests

Nuclear scan

CT angiogram

Other additional tests

Coronary angiogram

Non-Medicine Management

Take a rest in an quiet environment

oxygen absorption

Medicine Treatment

Medications

- Aspirin (阿斯匹靈)
- Nitroglycerin (舌下含片硝化甘油)
- Beta blockers
- Angiotensin-converting enzyme (ACE) inhibitors and angiotensin receptor blockers (ARBs)
- Calcium channel blockers
- Cholesterol-lowering drugs
- Clopidogrel
